**Title:** Legacy Greenwing Project at Dewey Wills Wildlife Management Area  
**Location:** Dewey Wills WMA – LaSalle Parish, Louisiana, approximately 20 miles northeast of Alexandria  
**Purpose:** Restore and enhance forested wetland habitat for wintering waterfowl and provide public hunting opportunities.  
**Logistics:** Construction of approximately 3 miles of levees and installation of 6 water control structures and other drainage features. DU engineers will oversee all survey, design, and construction management for the project.  
**Ecological Benefits:** Restoration of 3,000 acres of forested wetland habitat will increase foraging opportunities for wintering waterfowl and mimic natural seasonal flooding regimes.  
**Partners:** DU, Louisiana Department of Wildlife and Fisheries, Wetlands America Trust, Tunica-Biloxi Tribe of Louisiana, North American Wetlands Conservation Council and others.  
**Total Project Cost:** $790,000 — Legacy Greenwing Goal - 100 ($20,000)
