

UNITED STATES WATERFOWL HUNTERS, DID YOU KNOW?

- Nobody cares for waterfowl hunters and our heritage more than Ducks Unlimited. Our vital habitat work has a positive impact on waterfowl populations and helps guarantee the resource for future generations!
- Ducks Unlimited's #1 conservation focus area – the Prairie Pothole Region – provides North America with more than 75% of our waterfowl population.
- In addition to the prairies, DU performs vital habitat conservation work in all major breeding areas, including the Western Boreal Forest, Great Lakes Region, Alaska, the Pacific Northwest and Atlantic Canada.
- DU has conservation projects in all 50 states, every Canadian Province, and important waterfowl wintering areas in Mexico.
- DU is the only waterfowl conservation organization that delivers continent wide habitat conservation work to promote healthy waterfowl populations.
- DU is the only waterfowl conservation organization with a Washington D.C. staff dedicated solely to representing conservation needs when congressional issues may impact waterfowl habitat.
- The dollars raised at local DU events are the primary funds that drive our waterfowl habitat conservation programs.
- The best way duck hunters can help protect the future of waterfowl hunting is by volunteering for their local DU committee.
- Our local DU event system would fail to exist without the dedicated volunteers who organize and manage local DU chapters across the country.

- Duck hunters founded DU in 1937 and hunters make up more than 90% of our current membership.
- Because our members and Board of Directors believe so strongly in our conservation mission, at least 80% of the dollars raised by DU are dedicated towards our conservation efforts.
- While DU's #1 priority is waterfowl, more than 900 wildlife species benefit from our conservation work.
- DU has conserved more than 12 million acres of waterfowl habitat in North America, more than any other conservation organization in existence.
